## DETAILED ACTION

### *Election/Restrictions*

Applicant's election with traverse of Group I, claims 1-15, in Paper No. 10 of 23 July 2003 is acknowledged. The traversal is on the ground(s) that the Group I claims and the Group II claims are drawn to the same inventive concept in accordance with MPEP 1850, and as such, claim 19, Group III, should also be included.

This is not found persuasive because the Group I claims, a blend, and the Group II claims, a fiber or fabric, are both products and, as such, follow the rules for different inventions in accordance with MPEP 1875(b):

An international or a national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories:

- (1) A product and a process specially adapted for the manufacture of said product; or
- (2) A product and process of use of said product; or
- (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or
- (4) A process and an apparatus or means specifically designed for carrying out the said process; or
- (5) A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process.

Group II is a product, different from the product of Group II. The Group III claims are drawn to a process for making the invention of Group II, which was not elected.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1711

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

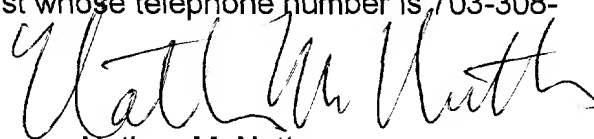

Claims 1-15, 20 and 21 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Shamshoum et al, newly cited.

The reference to Shamshoum et al teaches essentially what is recited and claimed at the Abstract, column 1 (line 53) to column 2 (line 11), column 4 (lines 53-57) and the many Examples.
